# TECHNICAL DATA

## MAXIMO® EVOLUTION ACTIVE

The innovative actively and electronically controlled suspension of the Maximo Evolution Active reduces vibrations by an average of 40%, and the peak acceleration levels by as much as 75%. Active weight adjustment completely automatically sets the seat to the user's weight. These features, together with optimized suspension travel, let the seat fully tap its potential for delivering greater ergonomics and safety. In addition, an active seat climate system with removal of body moisture makes sure that the operator never again has to sit at the wheel drenched in sweat.

**Features** ● Standard ○ Optional

Pneumatic Suspension

Active Suspension

Pneumatic Lumbar Support

Swivel

Automatic Shock Absorber

Automatic Positioning System

Electronic Weight Adjustment

Lateral Suspension

Fore/Aft Isolator

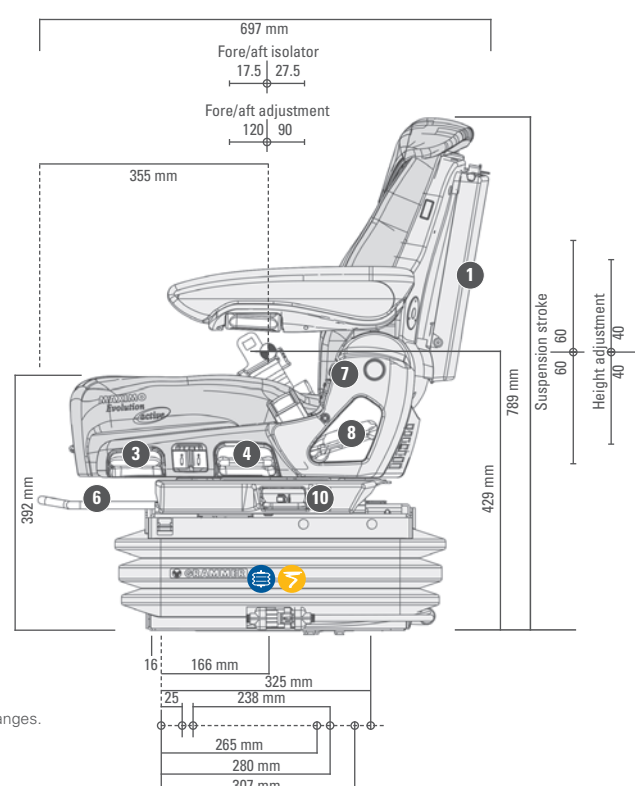

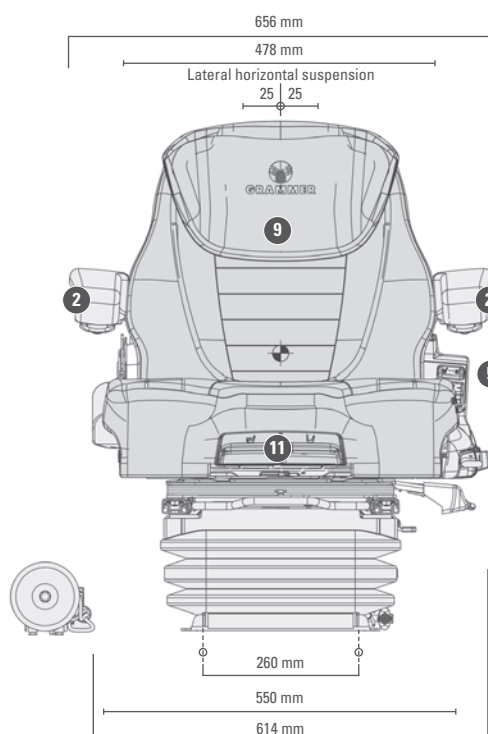

Active Climate System
