

GRAMMER BUS PASSENGER SEATS

BACK ON ROAD

Our vision is to become a full-line supplier of bus seats.

As a full-line supplier of passenger and driver seats for trains, we offer a complete range of seats for high distance and premium, regional and intercity and city traffic.

Now we are also widening our bus seat range step by step. Our vision is to likewise become a full-line supplier of driver and passenger seats for buses in all segments.

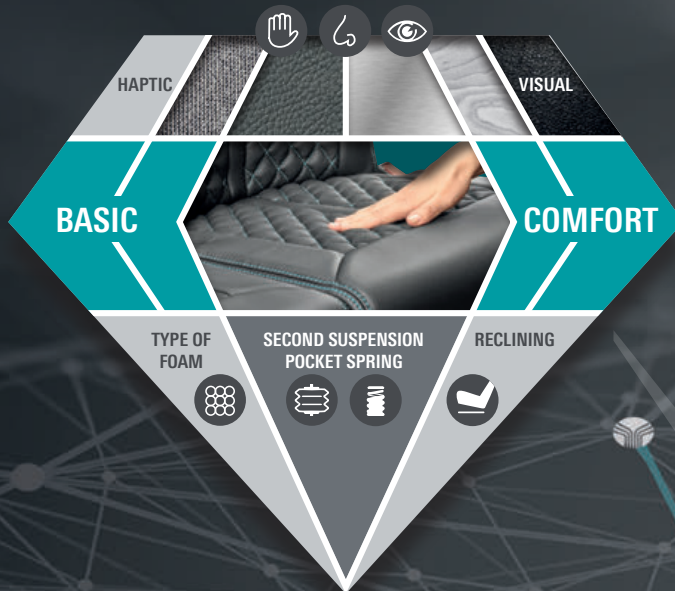

We offer individual solutions addressing all customer requirements and set standards in comfort, ergonomics, design, modularity and safety with our products.

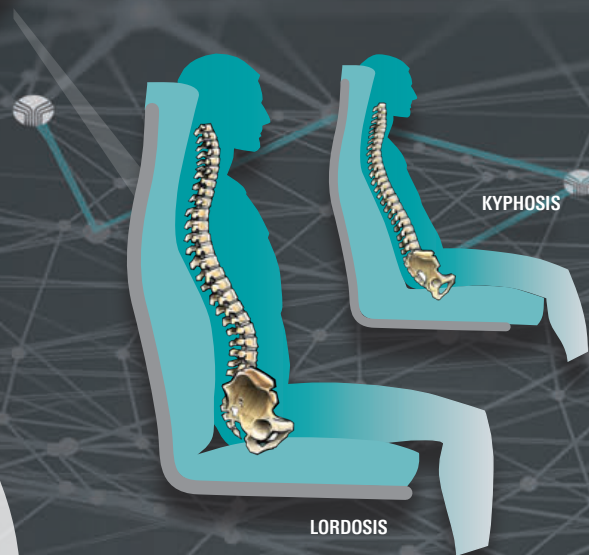

CORE COMPETENCES

PERCEIVED QUALITY

Product quality – for all the senses.
For a product to be really good, our customers must be able to perceive it with all their senses.

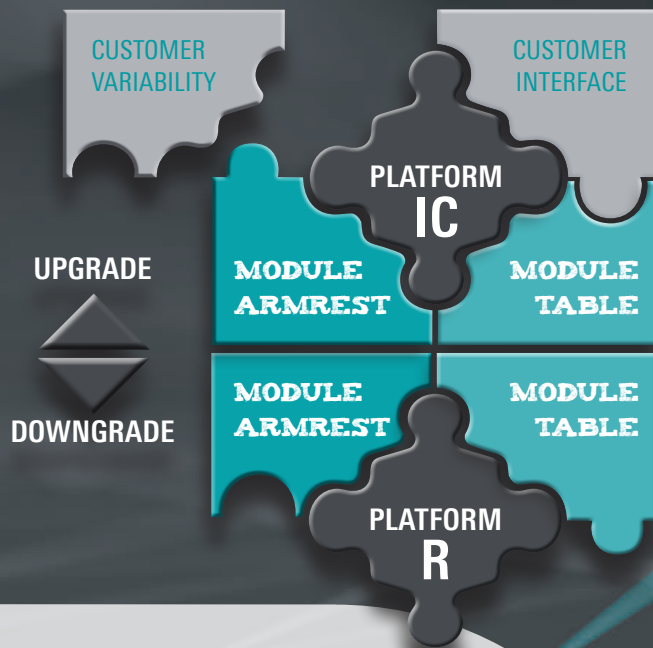

We offer seats in all levels of comfort.

ERGOMECHANICS

As trend setters in ergonomics, safety and comfort, we have been working closely with scientists, universities and research institutions for many decades.

Ergomechanics is the key word for seats meeting the highest requirements. By linking ergonomics and biomechanics, we are able to design seats that feature a sophisticated suspension system for minimizing vibration strain for passengers.

MODULAR DESIGN

Individual solutions for all types of use. Our modular designs combine top functionality with extensive adjustability and a modern look. Discover the countless possibilities offered by our modular designs with their numerous comfort upgrades and downgrades.

Whether you are looking for a simple or a luxurious solution, we offer individual, bespoke solutions in all segments.

CONNECTIVITY

Whether it's for work or entertainment, seats offer numerous opportunities for integrating technical applications such as.

- > Power sockets
- > USB
- > Charging facilities
- > Tablet holder
- > Table for laptop

CITY3000

The seat for city traffic
