TECHNICAL DATA

PRIMO® XXM

The Primo XXM has an easy-to-use lever for optimally setting the suspension to the driver's weight within the range between 45 and 170 kg. Especially when a vehicle is used by multiple drivers, it's important for unpracticed users to be able to quickly and intuitively perform this important setting. The extra-high backrest, in conjunction with a lumbar support, bolsters the back and ensures an even more comfortable ride.

Mechanical Suspension

Mechanical Lumbar Support

Manual Weight Adjustment

Features ● Standard ○ Optional

	PRIMO® XXM
Article no. fabric	1293475
Article no. imitation leather	1106231
Shock absorber nonadjustable	●
